

## Technology Demonstration Proposal

Thank you for your interest in the SoCal Edge initiative. Please complete this short questionnaire to outline your proposed demonstration project. If your technology is selected for inclusion in SoCal Edge, the LABBC will contact you to discuss a formal Partnership Agreement. If you have any questions, please contact [info@la-bbc.com](mailto:info@la-bbc.com).

**Summary of Features & Benefits:** AquaRimat Flowless unit is a Smart Water Meter, which learns the habits of water usage, detects any types leaks in real time (even in drops), and notification of leaks with remote water shut off. The Flowless system is the most advanced technology solution for leak detection, water damage prevention, water education and savings, and the control of your water system.

**Expected savings:** Average savings 15-30%

**Measurement & Verification process:** The Flowless Smart Water Meter has a "FAM" Master Meter with an integrated Flowless computer brain, and water shut off valve.

**Ideal Building Type:**

**Commercial (high rise, retail, office buildings etc) Industrial, residential (multi family and single family dwellings)**

**Minimum Building Size (If Applicable):** N/A

**What equipment /system is the demonstration project replacing or augmenting?**

The flowless smart water meter is available in 3/4", 1" 1.5" and 2" and is a supplemental meter installed anywhere after the city meter on the property (including outdoors and indoors)

**Demonstration Area / Square Footage Requirement (If Applicable):**

There is no specific square footage required, each installation is customized to the needs of the property.

**Number of Units (If Applicable):** Number of units depends on size of property (number of floors, landscape/irrigation units, number of individual units on the property)

**Duration of demonstration (If relevant):**

**Cost of demonstration:** Each Flowless unit cost is between \$1000 - \$2500 depending on size of unit. Number of units can vary.

Will a manufacturer's rebate be offered for projects that scale up?  Yes  No

**Who is responsible for the installation?** It is recommended that installation is done by property owners plumber. AquaRimat can also supply installers for demos.

Does the owner keep the equipment at the end of the demonstration?  Yes  No
