

# LACI PORTFOLIO COMPANIES

## **Ampaire**

Ampaire develops high performance, zero emission aircraft to transform the landscape of aviation. With key innovations in energy storage, propulsion, and aircraft architecture, their team is maximizing the potential of the aircraft industry.

## **AMPLY Power, Inc.**

Autonomous power charging-as-a-service for EV fleets.

## **Avisare**

Avisare is a modern SaaS platform that levels the playing field for small businesses to compete for government contracts while simplifying and streamlining the bidding processes for government agencies and Tier 1 contractors.

## **BK Litec**

LED solutions that enable a cheaper, simpler way to deploy both energy efficient lighting and IoT hardware through existing light sockets.

## **CLB Americas, Inc.**

Ramping up commercial production of a disruptive very high capacity Silicon-Carbon composite lithium battery anode material.

## **CLEVR Mobility, Inc**

Free-floating shared electric personal mobility platform as an extension of public transit.

## **Connect Homes**

Beautiful modern green homes for half the price. Delivered anywhere.

## **diviningLAB LLC**

Data-driven decision support tools for water-smart planning and design in drylands.

## **Eli Electric Vehicles**

Personal mobility, reimagined - Eli ZERO is a simple yet advanced micro-EV that makes short trips within cities and suburban communities easy and fun.

## **FITScrubs®**

High performance medical uniforms made with proprietary silver embedded fabrics that kill bacteria.

## **Green Commuter**

Disrupting commuting and mobility by offering a synergistic model of all electric vanpooling, car sharing and fleet replacement services.

### **Hive Lighting**

Manufactures high performance, energy efficient Plasma and LED lights for Entertainment, Architecture, Sports and Science.

### **Hollywood Electric**

The global leader and pioneer in all-electric 2-wheelers offering the widest range of electric motorcycles, scooters and the world's first EV performance kits.

### **MOEV, Inc.**

MOEV Inc. develops smart solutions for managing electric vehicle energy usage within microgrids.

### **Nature Coatings**

Nature Coatings transforms wood waste into high performing, non-toxic pigments for textiles, printing, architectural coatings and more.

### **Nevados Engineering**

Improve solar project economics with an all-terrain solar tracking system driven by intelligent controls.

### **Perch Mobility, Inc.**

Perch Mobility provides co-charging solutions for eScooter companies.

### **Pick My Solar**

A simple, trusted way for homeowners to go solar. Below market-value bids and in-depth analysis provided to homeowners at no charge.

### **Rain Systems**

Patented process that installs a cross-link polymer into existing turf, at root level, which reduces irrigation requirements by 50%.

### **Repurpose Compostables**

The leading consumer brand in eco-friendly tableware. Repurpose products are 100% made from plants, non-toxic, renewable and compostable - a sustainable and affordable alternative to single use plastic products. Welcome to a cleaner world.

### **Saya**

SAYA deploys a modular IOT water management solution designed for sub-metering and mitigating catastrophic water related risks.

### **Seatrec, Inc.**

Seatrec provides clean energy solutions to power underwater drones with increased lifetime and reduced cost.

### **Sorsa-MED**

Sorsa-MED is developing a robust microalgae platform for the biosynthesis of cannabinoids and their novel derivatives at commercial scales.

### **Xtelligent**

Bridging today's traffic signals to tomorrow's connected and autonomous future.
