

LACI ENERGY INNOVATORS COHORT 3: OCTOBER 2018

The LACI Energy Innovators Program helps clean energy startups in the Santa Barbara, Ventura, Los Angeles, and Orange County regions navigate Southern California's resources and support network. Through the LACI Energy Innovators Program, LACI leverages its expertise and robust network of partnerships to directly foster the clean energy technologies that will help meet the state's energy goals and ultimately benefit California ratepayers.

Alumina Energy

Energy Efficiency

Alumina Energy designs and builds low-cost, high performance energy storage systems for the utility-scale power generation and process heat markets.

MoreSolar

Solar

MoreSolar uses wind power to keep solar panels clean and maximize their energy output.

CyberPowered Home

Energy Efficiency

CyberPowered Home's smart energy management system automatically senses, interprets, and acts on electrical use information, helping homeowners save 25% on their energy bills and utilities manage an increasingly complex electrical grid.

ReJoule

Energy Storage

Software and Analytics

ReJoule's custom battery management system provides unprecedented analytics on a battery's health to enhance the performance of second-life batteries and enable leaner, long-lasting storage systems.

ETC Solar

Solar

ETC Solar's novel solar cell architecture increases solar panel efficiency by 5%, improving solar panel performance and significantly lowering manufacturing costs.

Storage

Software and Analytics

Storage's software aggregates and analyzes solar energy data for a more profitable and seamless grid management.

KOMFORTiQ

Energy Efficiency

KOMFORTiQ uses IOT technologies and predictive analytics to create a demand-based HVAC zoning system that helps fix temperature problems in commercial offices and reduce greenhouse gas emissions.

Sunnie

Solar

Software and Analytics

Sunnie develops tools that automate and simplify the solar sales experience from end-to-end.

VNEnergy

Software and Analytics

VNEnergy provides AI enhanced energy solutions for the microgrid environment.
